

▼ Palmscale 8 Advance ▼

The Palmscale has a longstanding reputation of delivering new and innovative styles while providing a scale that's accurate and easy to use. This scale is also the #1 selling premium pocket scale in USA, UK, and Canada. It's the choice of numerous universities, dieticians, and has made a name for itself as a field scale in law enforcement.

The new Palmscale 8.0 draws on all the previous generations of Palmscales. The PS 8.0 offers similar hyper-advanced features to the PS7 including dual line display with price computing functions and the ability to display 2 modes at the same time (eg both grams and ounces) but with further enhancements. One of the main upgrades for the PS8 compared to the PS7 is the original patented Palmscale Hydro Hinge which provides easy opening of the scale with just the flick of a button. The PS8 is actually the first Palmscale ever to be powered by AAA. Previous Palmscales were powered by Li-Ion button batteries or a proprietary rechargeable battery. The sleek chrome body and rubberized form-fitting casing makes it stylish and easy to handle. We kept the reverse lit display which is an amazing feature that makes the scale very easy to read in all weighing environments.

Once you open the PS8 you'll immediately understand that this is not an ordinary digital scale. The Palmscale has and will be the industry standard for all pocket scales. There is no question why the Palmscale has won numerous awards and is at the top of the line in the field.
